PRESS RELEASE

Gelpac invests $5 M in its Marieville plant

Marieville, July 13th, 2020 – Gelpac, a specialist in the manufacturing of multiwall paper bags and polyethylene packaging, announces a $5 million investment in its Canadian plant in Marieville.

This investment will lead to the acquisition of even higher performance pieces of equipment in the flow of the company’s continued strong growth over the last years in the Canadian and American markets.

With plants in the provinces of Quebec, Ontario, and in the United States, Gelpac has been a premium supplier of high-performance packaging solutions for the food, chemical and construction industries for more than 60 years. Its multiwall paper bags and its many polyethylene packaging products are designed to meet the specific requirements of each client. They are manufactured on production lines with state-of-the-art technology manned by seasoned teams with a common passion, that of a job well done.

“Strong of the steadfast trust of our numerous clients and the enthusiasm and loyalty of our personnel, Gelpac is proud of its significant contribution to North-American job growth with this major investment” underlined Mr. Alain Robillard, president and CEO.
